NATIVE PATRIOTISM.

Sons of Patriotic Fathers!—Hears of the Fathers of '76?—Are you prepared to give your birthright for a mess of pottage? Your sacred inheritance, is it to be given for foreign empires, for the sake of the dollar? For the sake of the dollar, you permit foreign empires to enslave you? Will you permit a foreign Patriot, the high his nation here, to fill your offices of trust and honor? Will you allow them to dictate to your President and Representatives, telling them what should be done upon the inheritance purchased for you, by your patriotic Fathers' blood upon many a battle field? Shall the Tree of Liberty, planted by the Patriots of the Revolution, be uprooted by the Jesuits (the minions of the beast of Babylon) who have sold Europe with the blood of your illustrious grandfathers, and when the New World was opened to your forefathers, by an over-riding Providence, as a place of refuge from this beast, these vampires would follow them here, like blood-suckers, that they might again feed upon the blood of their children.

They have crept like the vermin of Egypt into your houses, have been warmed by your fires, fed at your tables, and poured their hordes among you, and having waxed strong, they tell you to leave the country, if you do not like it and they have openly made their boasts that you should be the hammer, or the nails—should drive, or be driven! This was boasted in the streets of Rome, by one of their Holy Fathers! (God save the mark)

SONS OF AMERICA!

'Ye were not begotten in fear.' To you belong the perpetuity of this Union. Down, then, with the demagogues, of whatever name or creed they may have, that dare league themselves in opposition to American Rules! 'Americans shall rule America!' and to none but God shall they kneel.

'And this be our motto,
In God we trust!
And the star-spangled banner in triumph shall wave,
O'er the land of the free, and the home of the brave.'
No refuge shall save
The harlot and slave,
Who have vainly sworn,
A home and a country they would leave us no more!

They shall and must be put out of existence as an organized body, and, if needs be, expelled our shores, and in their train shall follow the curion jail birds, who do their filthy work. Europe shall have those dear pets again, (some of her better citizens.)

Americans! let no birding bands alight, or desecrate your land, but be ye the rulers; make your laws, and that in your own language, be your own soldiers, and worship God according to the dictates of your own conscience; acknowledge no dictators from Potentate, Pope, Priest, or demagogue, in teaching the principles of Washington, or Republicanism.

We need less saying about our democracy—our wholeness—our patriotism, but more solid ground, and true American aid, less running after foreign apes and men-monkeys, who, in (Bismarck), preach Republicanism in our streets. We want less distorting of our National Constitution; more genuine ideas of justice, founded upon our Union and compact. We desire the veto power—the *libas-corpus* power—not their perversion by rabid fanatics. We want less of sectional legislation, but desire for the whole country, from the Atlantic to the Pacific, real what is justice in Maine, is justice in California.

We want our President, Senators, and Representatives to discharge better their duties, with less fondness. We want our halls of congress not filled with men of wiser sentiments, stimulated by whisky, (sold in the basement of the Capitol,) but men feeling not for \$5.00 per diem, but for the country's good. We want not men to go to Congress to make blackguards of themselves, and make our nation appear contemptible abroad.

We want the bone and sinew of the land as our representatives; men, not chosen for their impudence from among the learned professions, but we want men who are wary as serpents, but as harmless as doves;—as to purity and integrity, men who are not to be led astray by every bubble that is brought before them; men who cannot be wheedled by Jesuitical cunning; outward bribery, or whisky slings; men who would not stoop to solicit office for friends, or themselves, for office salesmen who were unwilling to make themselves targets, to be shot at by foul-mouthed, blackguard politicians. Such men as these can be found in every State in this Union. Select these, therefore, and take my word for it, you will not be far wrong, in saying that the principles of your fathers will be carried out, and you will more strongly secure yourselves in the title of 'heirship'—76.

Yours,
CARBON PUNCH.

Kentucky Trust Co. Bank—Important Decision.

The above important case was decided yesterday, in Covington, by Judge Pryor. The facts were these: The charter of the Company provided that the subscription stock should not exceed \$100,000, and that notes should not be issued except to the amount of the stock actually paid in; that some years after the bank had gone into operation, they sold \$200,000 worth of stock to Sturges, for which he paid only \$50,000. Afterwards Sturges transferred this stock to the Savings Bank, which assumed to pay the Trust Company \$200,000, and the bank credited Sturges with the \$50,000, and notes of the bank were issued on the faith of that stock for \$200,000 and were put in circulation as the true Sturges subscribed for the stock, and

long before he transferred it to the Savings Bank.

The effect of a lengthened decision, rendered by the Court, was that the Bank exceeded its authority in taking a subscription for the \$200,000, and that, as stock, it was void, and not enforceable; that the Bank was not compelled to issue certificates for the stock; that Sturges was not bound to pay the Bank for it, and the Trust Company was not bound to pay for it, or issue the certificates of stock to the Savings Bank; and that, therefore, the Trust Company was not entitled to any judgment against the Savings Bank. But in appropriate action, in the name of the Commissioners, suing for the creditors of the Bank, Sturges, or any of the Bank officers who participated in this act of issuing the Bank notes exceeding their authority, would be liable for the whole amount of the \$200,000.

In the same case there was a count in the declaration against Sanford upon a note executed by him to the Trust Company Bank for stock, no part of which had ever been paid into the Bank, and which note had been executed for the stock after the \$100,000 had been subscribed, and notes of the Bank put into circulation on the basis of this stock note of Sanford. On this point the Court decided there could be no recovery on this stock note of Sanford, because the Bank had no power to issue the stock to him, they having thereby exceeded their authority; but that, by an appropriate Court, they might recover, in the name of the Commissioners, the amount of the notes put into circulation, against Sanford, or other officers of the Bank who participated in the act.—Cincinnati Commercial.

The Paris Constitutional, previous to the sailing of the late steamer, had received a confirmation of the news of a late marine disaster which had for some time been agitating the public mind of Paris. The Constitutional says:

'We have received a confirmation of the sad news which has been these two days rumored about Paris. The frigate lost in the Straits of Bonifacio is the *Semillante*, which recently left Toulon with 100 soldiers on board. The vessel struck on one of the reefs in that passage, and immediately filled. The crew and passengers, making together 700 men, all perished. No other details have yet been received of this catastrophe. The loss has created the most painful sensation in Paris. Seven hundred men have perished, together with a vast quantity of cannon, mortars, shells, gunpowder, and shot. Nothing was saved—not a shred. All that has been washed ashore, so far as is known to Government, is two pairs of trousers.—The *Semillante* was going to the east.'

Extraordinary Affair.

This afternoon a young lady, very respectably attired, and who appeared suffering under a great degree of nervous excitement, was brought before the police magistrate, her arrest having taken place under the following circumstances: It appears that the prisoner, who gave her name as Miss Bolster, and stated that she comes from Port Sania, was this morning to the shop of Mr. Ashfield, the gunsmith, and purchased a pistol, requesting the brother of Mr. Ashfield, who served her, to load it. He complied with the request, when she put the pistol in her bosom. On his inquiring what she intended to do with it, she replied that she had come all the way to Toronto, a distance of three hundred miles from her home, for the purpose of procuring the liberation of her younger sister, who had been decoyed into a nunnery for the second time. She had, after great efforts, procured her freedom on the first occasion, but now, by some unaccountable means, the conductors of the nunnery had again got hold of her, and she herself had become nearly distracted at the thought of their detaining the young girl, who is only fifteen years old, and she did not know what evil might happen to her in such a place.

She said she had determined to go to the nunnery, insist on the immediate liberation of her sister, and if the lady in charge of that establishment persisted in detaining her, she had come to the conclusion to shoot her. On learning her intention, and being impressed with the belief that his customer would not shrink from carrying out her designs, Mr. Ashfield had conceived it to be his duty to call the attention of the Police Magistrate to the circumstance, leaving him to take any further action in the matter he might think best. On the appearance of the defendant in Court, and after hearing the same determination expressed from her own lips, the magistrate said that however strongly he might personally feel for her situation, he had no alternative, in the exercise of his duty, but to retain her until she could find bail to keep the peace, which had not been offered in her behalf up to the hour of going to press.—Toronto Patriot.

It will be seen by the following, which we clip from the Presbyterian Herald, that the Presbytery of West Lexington will meet in this place next Wednesday:

The Presbytery of West Lexington stands adjourned to meet in Cynthiana on the first Wednesday in April, at 11 o'clock A. M. Church Sessions are recommended to send up Statistical Reports and contributions to the Commissioners' and Contingent Fund according to the following assessment: Pisgah, \$8; Bethel, \$7; 1st Church, Lexington, \$15; 2d Church, Lexington, \$20; Frankfort, \$18; Woodford, \$4; Versailles, \$5; Walnut Hill, \$8; Salem, \$4; Winchester, \$7; Mt. Sterling, \$3; Hopewell, \$8; Mt.

Horse, \$5; Nicholasville, \$6; Clear Creek, \$6; Cherry Spring, \$5; Georgetown, \$5; Providence, \$3; Harmony, \$3; Union, \$2; Mt. Pleasant, \$5; Carrollton, \$2; North Middletown, \$2; Beard, \$2; Williamstown, \$3; Leesburg, \$3; Cynthiana, \$3; Warsaw, \$2. J. W. WALLACE, Stated Clerk.

A paper in this city, says the Louisville Courier, a few days ago took some pains to announce that the Democracy of Kentucky are not 'counting the Catholic influence,' and that not one of the nominees of the Democratic State Convention is a 'man of Catholic proclivities.'

The Dowling Green Standard takes notice of the statement, and remarks: We state, and if it be required, we have facts and statements to prove, that the Hon. B. L. Clark, though not a member of any church, yet all his sympathies, all of his prepossessions, and all of his proclivities, are for and toward the Roman Catholic religion.

The Cincinnati Commercial, of the 18th inst., says:

Hon. W. B. Kinkaid, one of the three Commissioners appointed by the Chancellor to wind up the affairs of the Kentucky Trust Company Bank, has resigned his post. We have not heard any cause alleged.

We learn, from a private source, that on Monday, the 26th inst., the business portion of Winchester, in this State, was almost entirely consumed. Supposed to have been the work of an incendiary.

We are authorized to announce Mr. H. C. IRELAND, as a candidate for Constable in the Cynthiana District.

We are authorized to announce THOS. B. ARNETT, as a candidate for Constable in the Eighth or Leesburg District.

In this mammoth-worshipping age, it is rare to find a man place his usefulness to the public before his interest. During a late visit to the 'City of Spindles,' we were presented by a professor and friend to the celebrated chemist, Dr. James C. Ayer, whose name is now perhaps more familiar at the bedside of sickness than any other in this country. Knowing the unprecedented popularity of his medicine, and the immense sale of them, we had expected to find him a millionaire, and rolling in wealth. But no, we found him in his laboratory, busy with his labors, among his crucibles, flasks, and retorts—giving his best personal attention to the health of a child, whose father, a professor and friend to the celebrated chemist, Dr. James C. Ayer, whose name is now perhaps more familiar at the bedside of sickness than any other in this country. Knowing the unprecedented popularity of his medicine, and the immense sale of them, we had expected to find him a millionaire, and rolling in wealth. But no, we found him in his laboratory, busy with his labors, among his crucibles, flasks, and retorts—giving his best personal attention to the health of a child, whose father, a professor and friend to the celebrated chemist, Dr. James C. Ayer, whose name is now perhaps more familiar at the bedside of sickness than any other in this country. Knowing the unprecedented popularity of his medicine, and the immense sale of them, we had expected to find him a millionaire, and rolling in wealth.
